Sumo side tables

design Dan Yeffet

Sumo is a set of assembly based on the perfect interweaving between a wooden frame (belt and legs) and a marble or travertine top. The key element of this micro-architecture is a belt made of solid oak maintaining the four legs in the good angle. The stone top, simply resting on the wooden frame, insures the natural inertia and the stability of the whole structure. A piece of furniture about balance and complementarity.

. Belt and legs in solid oak with a mat varnish (natural, grey or black tint finish)

. Top in black Marquina, white Carrara marble or travertine.

Other marble species upon request

. Dimensions : Ø 55 x H. 45 cm, 80 x H. 30 cm or Ø 100 x H. 30 cm)

. Made in Europe
